**SPI Systems Coordination Project**

Solar Power Industries Campus  
Belle Vernon, Pennsylvania  
Solar Power Industries  
Mr. John Veltri  
N/A  
N/A  
Fall 2008

The project required the creation of supporting documentation to coordinate the multitude of systems being employed in the new manufacturing spaces of Solar Power Industries. The overhead electrical systems utilized busduct power and lighting systems in continuous runs as illustrated in the photos. These systems must have continuous and unfettered access while allowing for mechanical drops feeding manufacturing equipment.
